PROFESSIONAL SUMMARY

AI & Machine Learning Engineer with over 2 years of experience in deep learning, predictive modeling, and modern full-stack web development. Experienced in designing, building, and deploying AI-powered applications, process automation, and scalable web solutions using Python, PyTorch, Vue.js, Angular, and Next.js. Skilled in bridging advanced artificial intelligence concepts with robust software engineering to deliver production-ready business solutions.

PROFESSIONAL EXPERIENCE

Founding Member

Nov 2022 - Present

Codesy, Verona, Italy

- Drive the conceptualization, development, and delivery of AI-driven solutions, successfully deploying 5+ intelligent automation tools for diverse clients.
- Manage end-to-end project lifecycles using Agile methodologies, consistently delivering projects on time and improving internal workflow efficiency by 20%.
- Coordinate cross-functional development teams of 3 to 5 members to build Python-based AI tools, RESTful APIs, and process automation systems.
- Lead strategic technical planning, translating complex business objectives into actionable engineering architectures to drive a 30% increase in system scalability.
- Oversee quality assurance, testing, and deployment of scalable AI applications, reducing post-launch bugs by 15% to ensure optimal efficiency.

Freelance Software Developer

Jan 2022 - Present

USA-Based Tech Company, Remote

- Develop, maintain, and optimize robust frontend and backend web applications using modern JavaScript frameworks including Vue.js, Angular, and Next.js, serving 10,000+ monthly active users.
- Design scalable architecture and integrate seamless user interfaces with complex backend systems, improving page load speeds by 25%.
- Collaborate with international teams to define requirements, deploy 12+ major updates annually, and continuously improve application performance to boost user retention by 15%.

EDUCATION

Master of Science in Artificial Intelligence

Expected Oct 2026

University of Verona, Verona, Italy

- **Thesis Project:** Causal Anomaly Detection and Signal Temporal Logic (STL).
- **Relevant Coursework:** Machine Learning, Deep Learning, Explainable Artificial Intelligence (XAI), Computer Vision, Logic in AI, Automated Reasoning and Planning, Statistical Learning.

BSc in Computer Systems Engineering

Jan 2019 - Nov 2022

Dawood University of Engineering & Technology, Karachi, Pakistan

- **Core Subjects:** Data Structures and Algorithms, Database Systems, Software Engineering, Computer Networks, Probability and Statistics.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, C++, SQL
- **Web Frameworks:** Vue.js, Angular, Next.js, HTML, CSS, Bootstrap
- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-Learn, CNNs, Text Preprocessing, Transformers, NLP, OpenCV, Grad-CAM, Transfer Learning
- **Deployment & Tools:** REST APIs, Flask/FastAPI, Git, GitHub, Docker, Google Colab, Linux, Jupyter Notebook
- **Data Science:** NumPy, Pandas, Matplotlib, Exploratory Data Analysis (EDA)

CERTIFICATIONS & LANGUAGES

- **Certifications:** Google Cybersecurity Certificate, Data Analytics & Business Intelligence, Tools of the Trade: Linux & SQL, E-commerce Management
- **Languages:** English (Professional Proficiency), Italian (A2)
